

Industrial Safety Professional®  
Certified Qualification

## Industrial Safety Professional® with TÜV Rheinland Certified Qualification

The qualification certified by TÜV Rheinland so that workers know the applicable legislation in Industrial Safety, know how to identify the needs that their facilities require and can establish strategies regarding Industrial Safety.

Target groups: Safety and Occupational Health Personnel. Company Safety and Health Committee. Maintenance Technicians. Managers, Administrative and Legalization Staff, and other workers interested in Industrial Safety.

Industrial Safety Professional®  
Certified Qualification

## Industrial Safety Professional® with TÜV Rheinland Certified Qualification

Nowadays, Industrial Safety is an essential factor in companies, as it not only protects workers, assets and equipment, but also contributes to the smooth operation of the organization and the reduction of costs associated with workplace accidents and weak points during inspections. Additionally, it enhances the company's reputation and improves the working environment.

This intensive course compiles, in a single day, the essential knowledge of Industrial Safety in all areas, from road/pedestrian safety to machinery, elevators, or energy and ATEX facilities.

Industrial Safety Professional® serves as a guide for all types of workers to understand the applicable legislation in Industrial Safety, identify the needs of their installations, and establish strategies in the field of Industrial Safety.

## Final evaluation

Each participant must pass a choice exam at the end of the training day.

Participants will have up to 60 minutes to complete the exam, which will consist of 40 multiple choice questions.

The exam will be considered passed when the candidate has achieved a minimum of 26 (65%) of the maximum number of correct answers.

The results will be communicated by email to each participant, three weeks after the exam.

Participants who do not pass the test will be able to try again in the next training session at a reduced cost.

## Virtual Class Online Modality

Both the Contents and the final Evaluation are the same for both modalities: In-person and Virtual Class Online.

However, there are some requirements that students must take into account in order to follow the online training effectively and fluidly:

- Computer or Laptop with camera and microphone.
- System: Windows 10 or higher / macOS
- Browser: Microsoft Edge, Google Chrome or Mozilla Firefox.
- Good Internet connection.
- To monitor the class: Microsoft Teams application (Optional but recommended).
- To take the TÜV Rheinland exam: access to Zoom, even if it is web.

During the exam:

- They will only be able to use one screen.
- They must have their identity document on hand. The TÜV Rheinland Examiner will ask them to show it.
- During the development of the entire exam, they must share their screen.
- The place or site where the exam will take place must be free of distraction, without access to drawers, notes or resource material, the student must be alone and clearly visible.
